Subject Submission of Response to EPA and Revised Test Plan and Robust Summaries for Alkyl-substituted Cyclohexyl Derivatives Chemical Category

Dear Administrator:

On behalf of the member companies of the Flavor and Fragrance High Production Volume Consortia, the Cyclohexyl Derivatives Consortium is pleased to submit a letter responding to the EPA comments on the chemical category "Alkyl-substituted Cyclohexyl Derivatives". We also wish to submit a revised test plan and revised robust summaries for this chemical category. In addition to providing data on human health, ecotoxicity, physiochemical properties, and environmental fate, the Consortium has sponsored an additional study addressing developmental and reproductive endpoints. The final report for this study will be available in February, 2007. At that time we will revised the draft report currently cited in the robust summaries. After submission of these data, the documents will be considered the final submission by the Cyclohexyl Derivatives Consortium for this chemical category. The cooperation of our Consortium with EPA has lead to the accumulation of relevant hazard data and provided many benefits both to the industry and the public. Our Consortium values the experience.

Respectfully,

Timothy B. Adams, Ph.D.
